SUMMARY

Ambitious and versatile Computer Science and Engineering undergraduate from Jahangirnagar University, maintaining a CGPA of 3.46 with one semester remaining. Passionate about Artificial Intelligence, Machine Learning, Full-Stack Development and Data Analytics, with hands-on experience building projects spanning NLP, computer vision, real-time web applications, and Android development. Currently conducting thesis research comparing classical image processing pipelines and deep learning (YOLOv26) for vehicle detection on Bangladeshi road datasets. A consistent problem solver with daily LeetCode practice and an active Codeforces rating, driven by a strong foundation in algorithms and data structures. Eager to contribute to innovative software and research environments, with interests in both industry roles and postgraduate studies.

EDUCATION

Bachelor of Science (B. Sc.) in Computer Science and Engineering <i>Jahangirnagar University</i> CGPA 3.46 out of 4.00 (<i>Running</i>)	03/2022 – Present Dhaka, Bangladesh
Higher Secondary Certificate (HSC) <i>Savar Cantonment Public School and College</i> GPA 5.00 out of 5.00	05/2018 – 11/2020 Dhaka, Bangladesh
Secondary School Certificate (SSC) <i>Savar Cantonment Public School and College</i> GPA 5.00 out of 5.00	02/2015 – 02/2018 Dhaka, Bangladesh

PROJECTS

Bangla Sentiment Analyzer

Python, Scikit-learn, TF-IDF, Streamlit

- Built a 5-class Bangla sentiment classification system (Positive, Negative, Neutral, Sad, Toxic) using a hybrid TF-IDF + character n-gram vectorizer with Logistic Regression
- Implemented a lexicon-based fallback strategy with negation rules for low-confidence predictions, achieving a macro-F1 score of ~0.846 on validation
- Deployed an interactive demo web app using Streamlit with real-time inference and confidence scoring

Personal Finance Tracker

Next.js 14, TypeScript, React, MongoDB, Tailwind CSS

- Developed and deployed a full-stack multi-user finance management web app with secure authentication, per-user data isolation, and a real-time dashboard for income/expense tracking
- Implemented budget tracking, spending analytics with interactive charts (Recharts), and CSV import/export with preview and undo functionality
- Deployed to production on Vercel with MongoDB Atlas as the cloud database backend

Android QR Scanner App

Kotlin, Firebase, CameraX, ML Kit, Material Design 3

- Built a full-featured Android QR code scanner app with real-time camera scanning, gallery-based scanning, and a built-in QR code generator using Google ML Kit and ZXing
- Implemented Firebase Authentication and Realtime Database for cloud-synced scan history and user profile management, with a complete offline mode for privacy-conscious users
- Followed repository pattern architecture with smart duplicate prevention, user-scoped data security rules, and versioned releases (v3.0.0)

Face Recognition Attendance System

Python, OpenCV, Scikit-learn, Streamlit

- Built an automated attendance system using real-time face detection (Haar Cascade) and a KNN classifier trained on captured face samples, logging timestamped attendance records to daily CSV files
- Developed a Streamlit web dashboard with auto-refresh to monitor attendance records, with voice feedback confirmation on successful recognition

JU Real-Time Chat App

Django, WebSockets, HTMX, Redis, Railway

- Developed a real-time web-based chat platform targeted at Jahangirnagar University students, enabling instant messaging via WebSockets and Django Channels
- Integrated Redis as a channel layer for managing concurrent WebSocket connections, deployed with Railway for cloud-hosted Redis and database services
- Built a multi-app Django architecture (home, chat, users modules) with HTMX for dynamic page updates without full page reloads

SKILLS & TOOLS

Programming Languages

Python, C, C++, Java, Kotlin, JavaScript, TypeScript

Frameworks & Libraries

Django, Next.js, React, HTMX, Bootstrap, Scikit-learn, TensorFlow, OpenCV, MediaPipe, NumPy, Pandas

Databases & Cloud

MySQL, MongoDB, Firebase, Redis, Google BigQuery, Railway

Tools & Platforms

Git, GitHub, Android Studio, VS Code, Google Colab, Streamlit, Vercel

Problem Solving

LeetCode (daily practice), Codeforces (Rating: 902, Highest: 1009)

CERTIFICATES

- | | |
|--|--|
| • Fundamental Information Technology Engineer Examination (FE), BD-ITEC, Bangladesh Computer Council | • Google Cloud Data Analytics Certificate, Google Cloud Skills Boost |
|--|--|

EXTRACURRICULAR ACTIVITIES

Martial Arts Club, Member <i>(4+ years)</i>	Jahangirnagar University
ICPC Regional Selection Contest <i>Participant, 2022 & 2023</i>	Dhaka Region
National Collegiate Programming Contest 2023 <i>Volunteer Organizer</i>	Jahangirnagar University

LANGUAGES

Bengali — Native	English — Fluent
